INTRODUCTION

Established in 2000, VESL is the only Oracle Partner to have gained the highest partner status of – **Oracle Certified Advantage Partner** – in Africa. Our unrivalled commitment to quality assurance has positioned us as preferred implementer of **Oracle E-Business Suite** – the leading Enterprise Resource Planning (ERP) solution. VESL’s proficient team of certified Oracle professionals is highly conversant with state-of-the-art Oracle technologies, complemented by a high degree of business expertise.

With numerous implementations across Africa of Oracle E-Business Suite under our belt, VESL has a comprehensive understanding of local, regional and continental legislative requirements, in both public and private sectors across all key industries. This is inclusive of international financial compliance standards such as Mid Term Expenditure Framework (MTEF) and International Financial Reporting Standards (IFRS).

COMPANY BACKGROUND

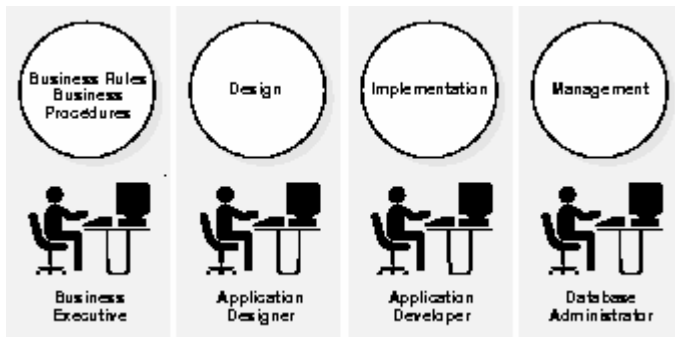

VESL Technologies Ltd was established in Tanzania under C.A.P 212. The company has expanded its activities to cater for not only the COMESA and SADC communities but the African continent in general. The presence of the company within the region has coincided with the establishment of the East African Head office in Dar es Salaam, Tanzania.

VESL was incorporated in Tanzania under Tanzania Investment Centre (TIC) in April 2000. The company regroups a consortium of technologies to cater for tailor made applications. The commitment to keep pace with the emerging technologies has been the focal point to adopt the right partner technologies. As a Certified Oracle Partner VESL implements **Oracle E-business Suite**, the industry's only completely integrated enterprise software solution.

THE VESL TEAM

The company is under the directorship and management of specialized technology experts in Oracle to manage its software development activities. The concept of the consortium is based on the slogan...

"Your strategic partner for strategic solutions"

The company was founded by a group of experienced and dynamic young professionals each specialized in specific fields of Information technologies, Multimedia technologies and business development strategies. The concerted efforts of VESL management revolve round the doctrine "The strategic solution providers aimed to achieve maximum level of competence and excellence".

The secret behind the success of the company is simply quality people and quality products. The total quality management of the organization has crossed boundaries and has been recognized for its dedication and an attractive working environment.

With a staff population of over 20 skilled professionals, VESL's working environment is made up of diverse nationalities and cultures all pulling together to give the company multi-dimensional facets for optimum business solutions. The team is thereby, positioned to operate in complex business settings and equipped adequately to face any challenge. The management believes in challenges, competition and competency to deal with the solution seekers as valuable partners.

VESL's position in the IT industry is further consolidated through partnerships with leading software vendors.

PRODUCTS AND SOLUTIONS

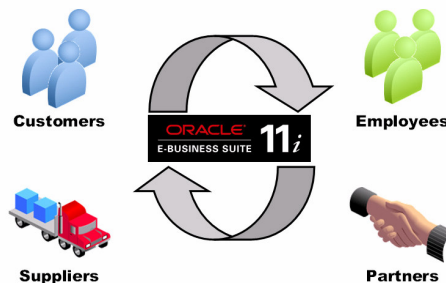

ORACLE E-BUSINESS SUITE

Oracle E-Business Suite offers your business a complete set of applications capable of automating any function of your daily business processes. Available for purchase by module or as a complete suite, Oracle applications assist you in everything from running your financial operations to managing your employees to marketing, selling, and providing customer service. Oracle E-Business Suite applications help you know more about your business; do more with your resources, and spend less.

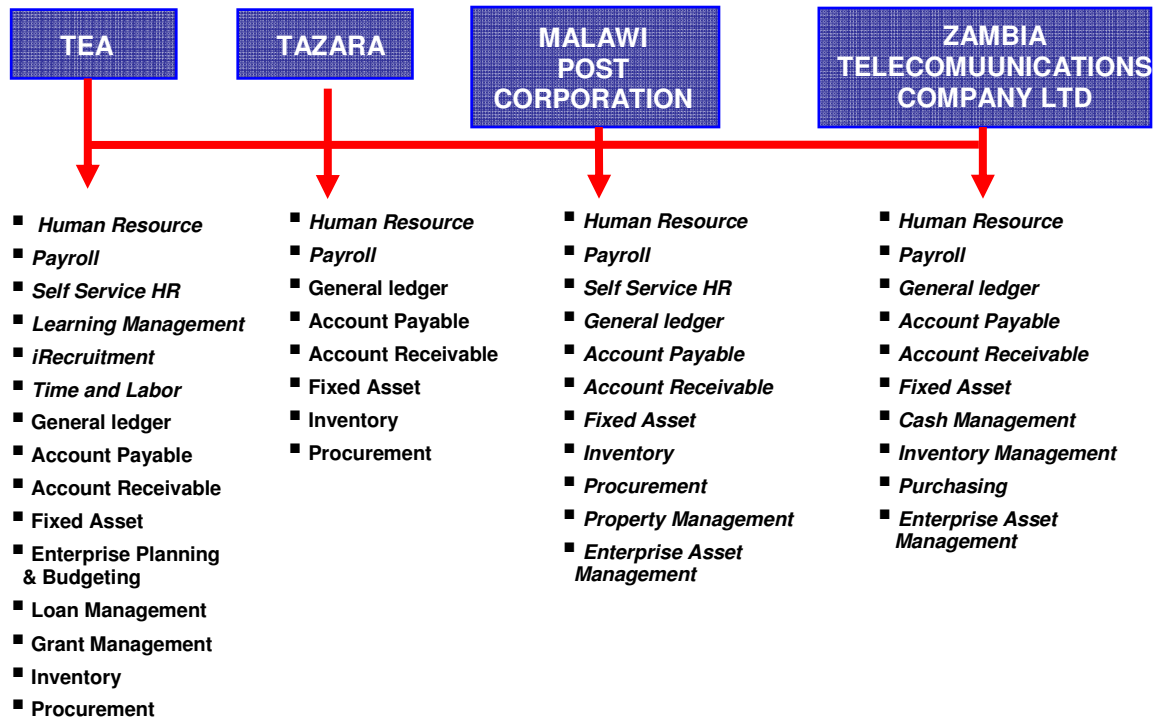

Experienced Oracle Applications Implementers

Having tackled several highly complex implementations in both public and private sectors across Africa, VESL has developed into an experienced implementer of the award winning Oracle E-Business Suite ERP – delivering maximized Return On Investment (ROI) on seamlessly integrated solutions.

Customization of Oracle Applications for our clients has included the development of customized reports such as PAYE reports for taxation purposes and other answering to all government reporting requirements financially and otherwise.

VESL has implemented Oracle Applications in diverse industries such as telecommunications, posts, transportation and education.

Through the implementation of Oracle Financials and Supply Chain, we have enabled our clients to achieve – complete financial visibility, transparency and accountability. Where previously transactional and consolidated information was error ridden, a seamlessly integrated financial solution has paved the way for optimum decision making tools indispensable in an increasingly competitive business arena.

Employee job satisfaction and the retention of a talented workforce drives business results and directly impacts customer loyalty, employee productivity and profitability. With the implementation of Self Service, VESL has empowered employees to proactively participate in HR activities, reducing cost and administrative paper work. By the integration of Payroll with HR and the General Ledger, a 360-degree view of operations is achieved.

BESPOKE APPLICATIONS

Our customer centric approach is central to our work ethic and dedication – attributes which are pivotal in establishing VESL as a software heavyweight within the region. VESL also designs and develops tailor made systems for various organisations large and small based on Oracle Technologies.

Payroll with HRMS features (POWER PAYROLL)

Country specific payroll, reports with Tanzania Revenue Authority approved layouts. Automatically prints monthly NSSF, VETA, PAYE and yearly P9, P10 reports.

Transport Management System

STRATEGIC CONSULTING

**Do you
speak
the language of
globalization?**

We analyse your business situation or idea and recommend solutions that will result in the highest and most timely return on investment. Our consultants are experienced in enabling companies to drastically reduce operating costs while introducing new avenues for generating revenue. VESL has proven itself as a leader in IT solutions for the ever-changing economy. Backed by more than 20 software and hardware development professionals, VESL delivers its expert solutions via six key areas including:

Client Server Business Applications

Our staff experienced applications developing using Oracle, Developer 9i, Visual Basic, Java and other web technologies.

Wireless Computing Solutions

At VESL we realize that wireless technology is the key to the future of communication and real-time access to data. We have the engineering expertise to seamlessly connect people to data anywhere, anytime with any device.

Internet Appliances and Devices

We design and build the hardware devices and software applications that enable you to access data when and how you need it. From idea to prototype, we are development experts for embedded Internet devices and appliances.

Advanced e-Business Solutions

Business needs have moved past simple store fronts, electronic brochures and web sites. VESL can integrate mission critical e-business applications into your enterprise fabric. Whether it's **B2B, E2E, CRM ERP or SCM**, VESL can provide efficient solutions for your customers, suppliers and employees.

Enterprise Architecture and Infrastructure

Your enterprise architecture is the systems backbone for your business. At VESL, we understand the importance of skilfully integrating heterogeneous n-tier server architectures with storage, networks and core business applications to offer a highly available and scalable infrastructure.
